

- **Ideal for hotel kitchen service.**
- **Carries up to 2000 pounds of kitchen utensils.**
- **Stays clean and sanitary with routine steam cleaning.**
- **Extra-wide, easy access shelves.**
- **N.S.F. listed.**

This rugged, serviceable, all-purpose utility shelf truck was designed especially for hotel banquet service. Its many exclusive features make it handy in any hotel kitchen or general service application.

Available in aluminum and stainless steel, it is extra strong and gives years of service life. It has a convenient push handle at one end and a semi-pneumatic, non-marking vinyl, bumper around the bottom shelf to protect walls and other equipment.

All edges are "hemmed" to eliminate the chance of employees cutting their hands. Shelves are welded 100% vertically on the long sides to prevent "racking" even after years of use. Each shelf holds 300 pounds—bottom shelf will take 500 pounds.

If you desire, the Model E-11007 shelf truck can be modified to meet your exact needs. Consult factory.

"Queen Mary" shelf truck
Model E-11007

Standard 6 shelf aluminum

Other features

- Aluminum models have 1/8" thick base shelf and 1/16" thick upper shelves.
- Stainless steel models use heavy gauge upper shelves and extra heavy (14 GA.) base shelf.
- Caster bolsters are 1/8" thick aluminum (or 12 GA. S/S) and are fully boxed and welded into one structure.
- 8" diameter heavy duty N.S.F. listed polyurethane casters with Delrin®/Celcon® bearings to withstand regular steam cleaning are standard.
- Shipped fully assembled with complete wrap around bumper and push handle.
