

- Heavy duty rack with large capacity designed for bussing or transporting trays.
- Choice of corrugated racks or extruded side panel racks.
- N.S.F. listed.

Model S-4354-D1878  
Extruded Side Panel  
Double rack

These racks are constructed of hi-tensile aluminum, and are easy to clean. They offer increased capacity. Base is all welded and uprights are welded to base to provide a strong and durable rack.

**Other features:**

- **Slides:** Corrugated racks have 0.063" thick sides with corrugations acting as tray slides. Extruded side panels are 0.075" thick with 0.100" thick slides and with interlocking panels using inverted "V" seams.
- **Uprites:** 2"x1"x0.125" special extruded aluminum channels. Middle uprites are 2"x1"x0.125" aluminum tubes.
- **Top & Bottom:** Horizontal members made from 2-3/8"x1"x0.125" special extruded aluminum channels.
- **Bolsters:** 0.125" formed aluminum for extra rigidity to provide a strong base.
- **Casters:** 5"x1 1/4" N.S.F. approved deluxe, all swivel. ■ **Spacing:** 1 1/2" on centers.
- **Other:** Horizontal stabilizing bars to prevent "racking".
