

- Vertical tray drying and storage racks for various pan sizes.
- Offered in removable corrugated shelves or extra heavy duty (fixed) extruded panel type shelves.

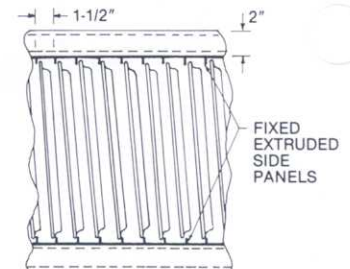

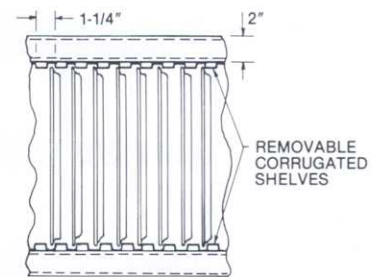

These racks are designed to facilitate air drying. Corrugated shelves allow trays to be spaced on 1 1/4" centers and both shelves are removable without the use of any tools. Extra heavy duty models use extruded side panels which are welded to the frame and which allow trays to be stored on 1 1/2" centers. **Both type of units are shipped completely assembled.**

Model 9040-264-11
(with removable corrugated shelves)

Model 9040-264-FR10
(with fixed extruded side panels)

Specifications:

Uprights and horizontal frame sides are 2"x1"x1/8". Extruded channels are welded together to form strong structure. Corrugated shelves are 0.063" thick aluminum and provide 1 1/4" spacing. Extruded side panels are 0.075" interlocking type and provide 1 1/2" spacing. Casters are 5"x1 1/4" deluxe, N.S.F. approved. Gussets are welded to uprights at bottom corners for extra rigidity when using stem casters. Extruded side panel type racks use 1 1/2 x 1 1/4 heavy wall rectangular tubing frame and heavy wall uprights.

Type of Shelf	Model No.	Pan Spacing (Inches)	Pan Capacity	Pan Size (Inches)	Overall Dimensions (Inches)			Weight (pounds)
